

6. Attacking

Attacking is a move when a chessman can capture the opponent's chessman in the next move. It is also called threatening.

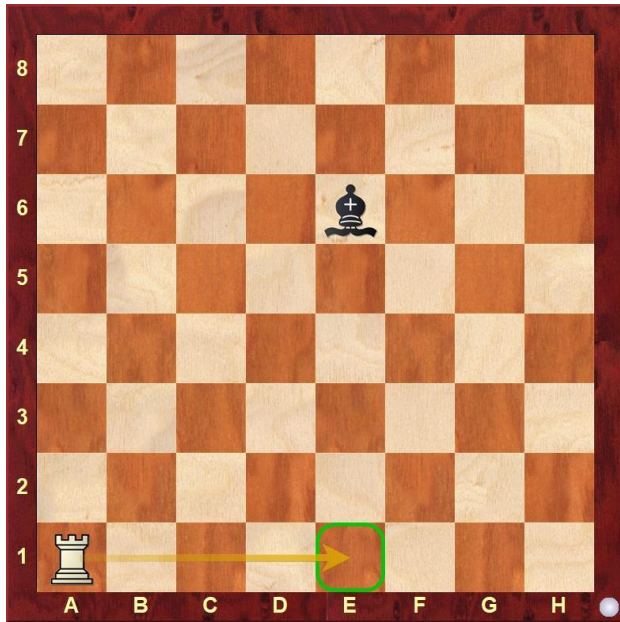

Diagram 6.1

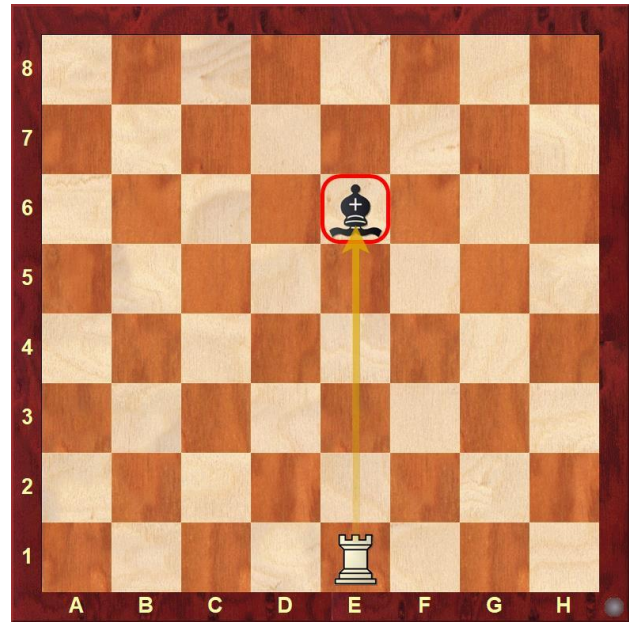

Diagram 6.2

In diagram 6.1, we can observe that the white Rook is standing on a1 and the black bishop is standing on e6. In diagram 6.2, white Rook has moved to e1 (Rook can also move to a6) which is performing an attack since Rook can capture Bishop in the next move.

BEGINNER LEVEL

6. Attacking

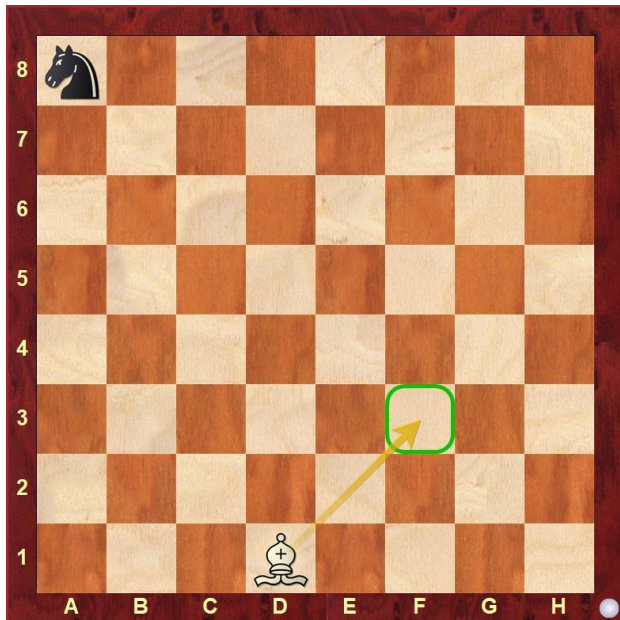

Diagram 6.3

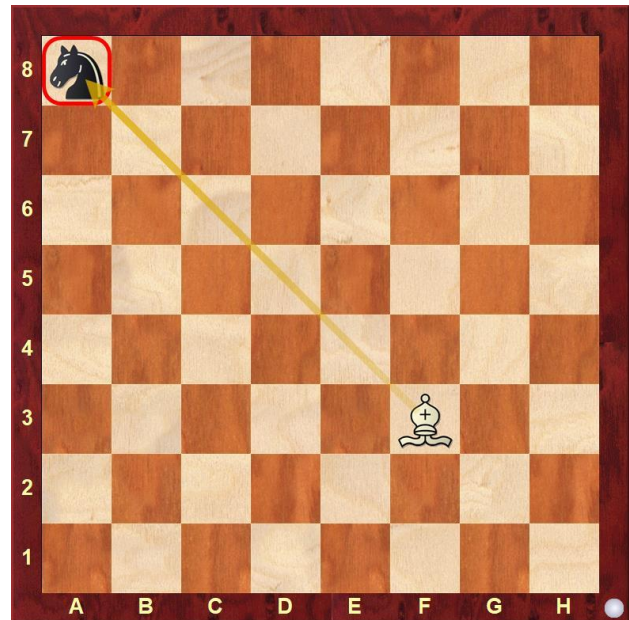

Diagram 6.4

In the diagram 6.3, we can observe that White Bishop is standing on d1 and the Black Knight is standing on a8. In diagram 6.4 white Bishop has moved to f3 which is performing an attack since Bishop can capture Knight in the next move.

Note: It is advised that attacking should be performed always from a safe square.

BEGINNER LEVEL

6. Attacking (Homework)

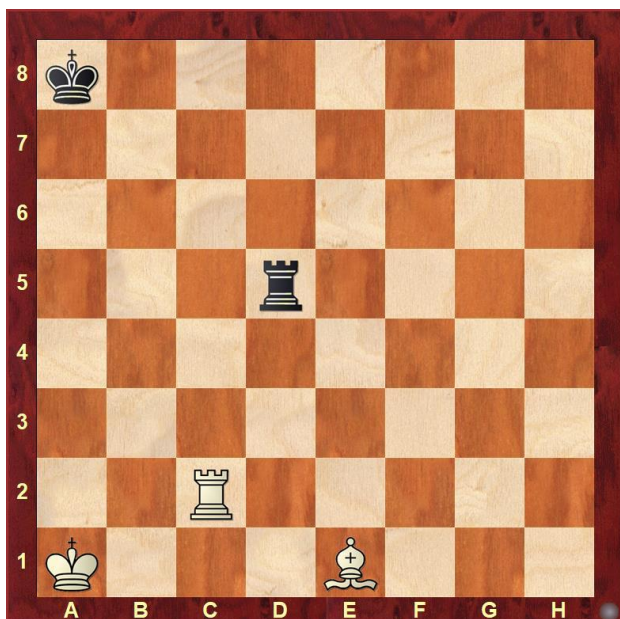

1. White to play and attack a black piece from a safe square.

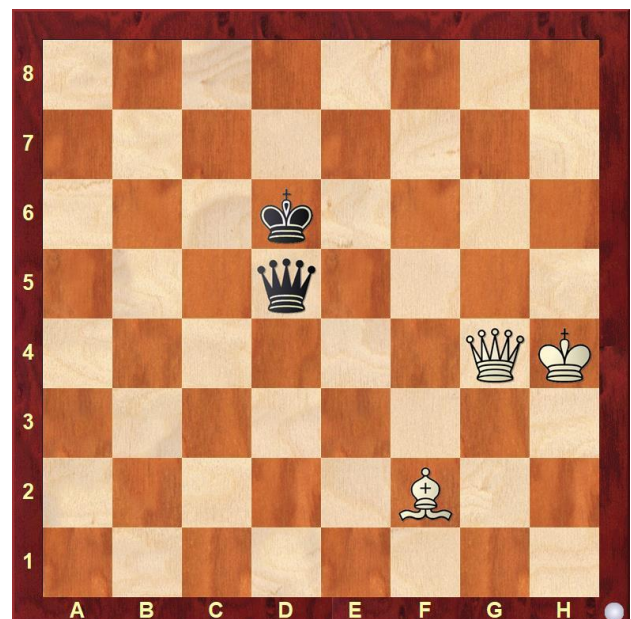

2. White to play and attack a black piece from a safe square.

3. Black to play and attack a white piece from a safe square.

4. Black to play and attack a white piece from a safe square.

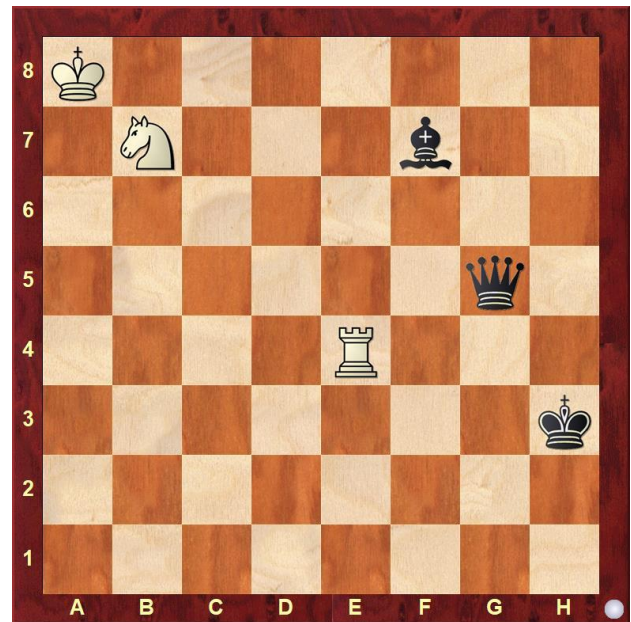

BEGINNER LEVEL

6. Attacking (Homework)

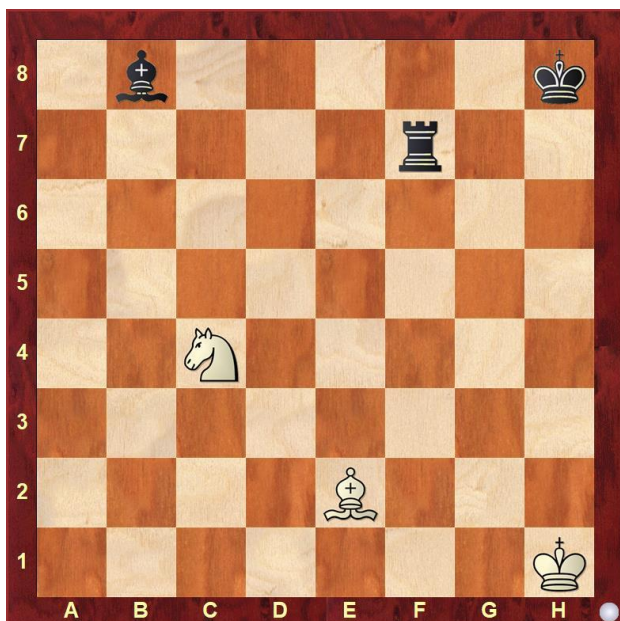

5. White to play and attack a black piece from a safe square.

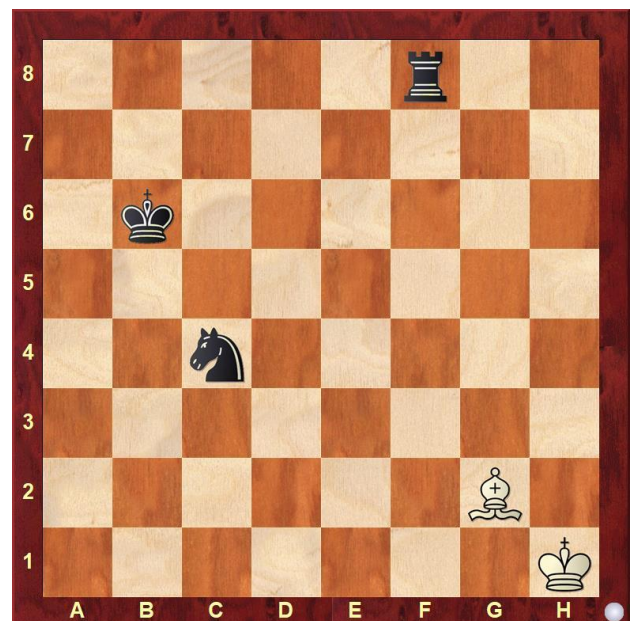

6. White to play and attack a black piece from a safe square.

7. White to play and attack a black piece from a safe square.

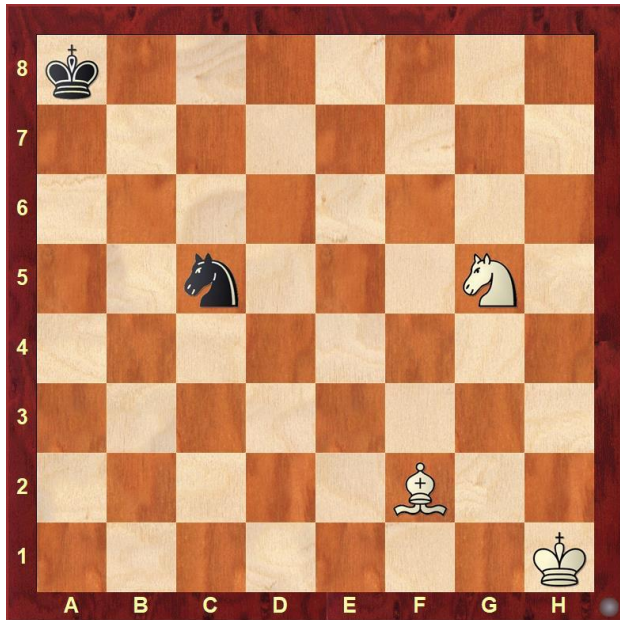

8. White to play and attack a black piece from a safe square.

BEGINNER LEVEL

6. Attacking (Homework)

9. Black to play and attack a white piece from a safe square.

10. White to play and attack a black piece from a safe square by saving the attacked piece.
